

Reference tree: Adnan: main branches

Trace shared trunks. Add locations beside the boxes and annotate the branches.

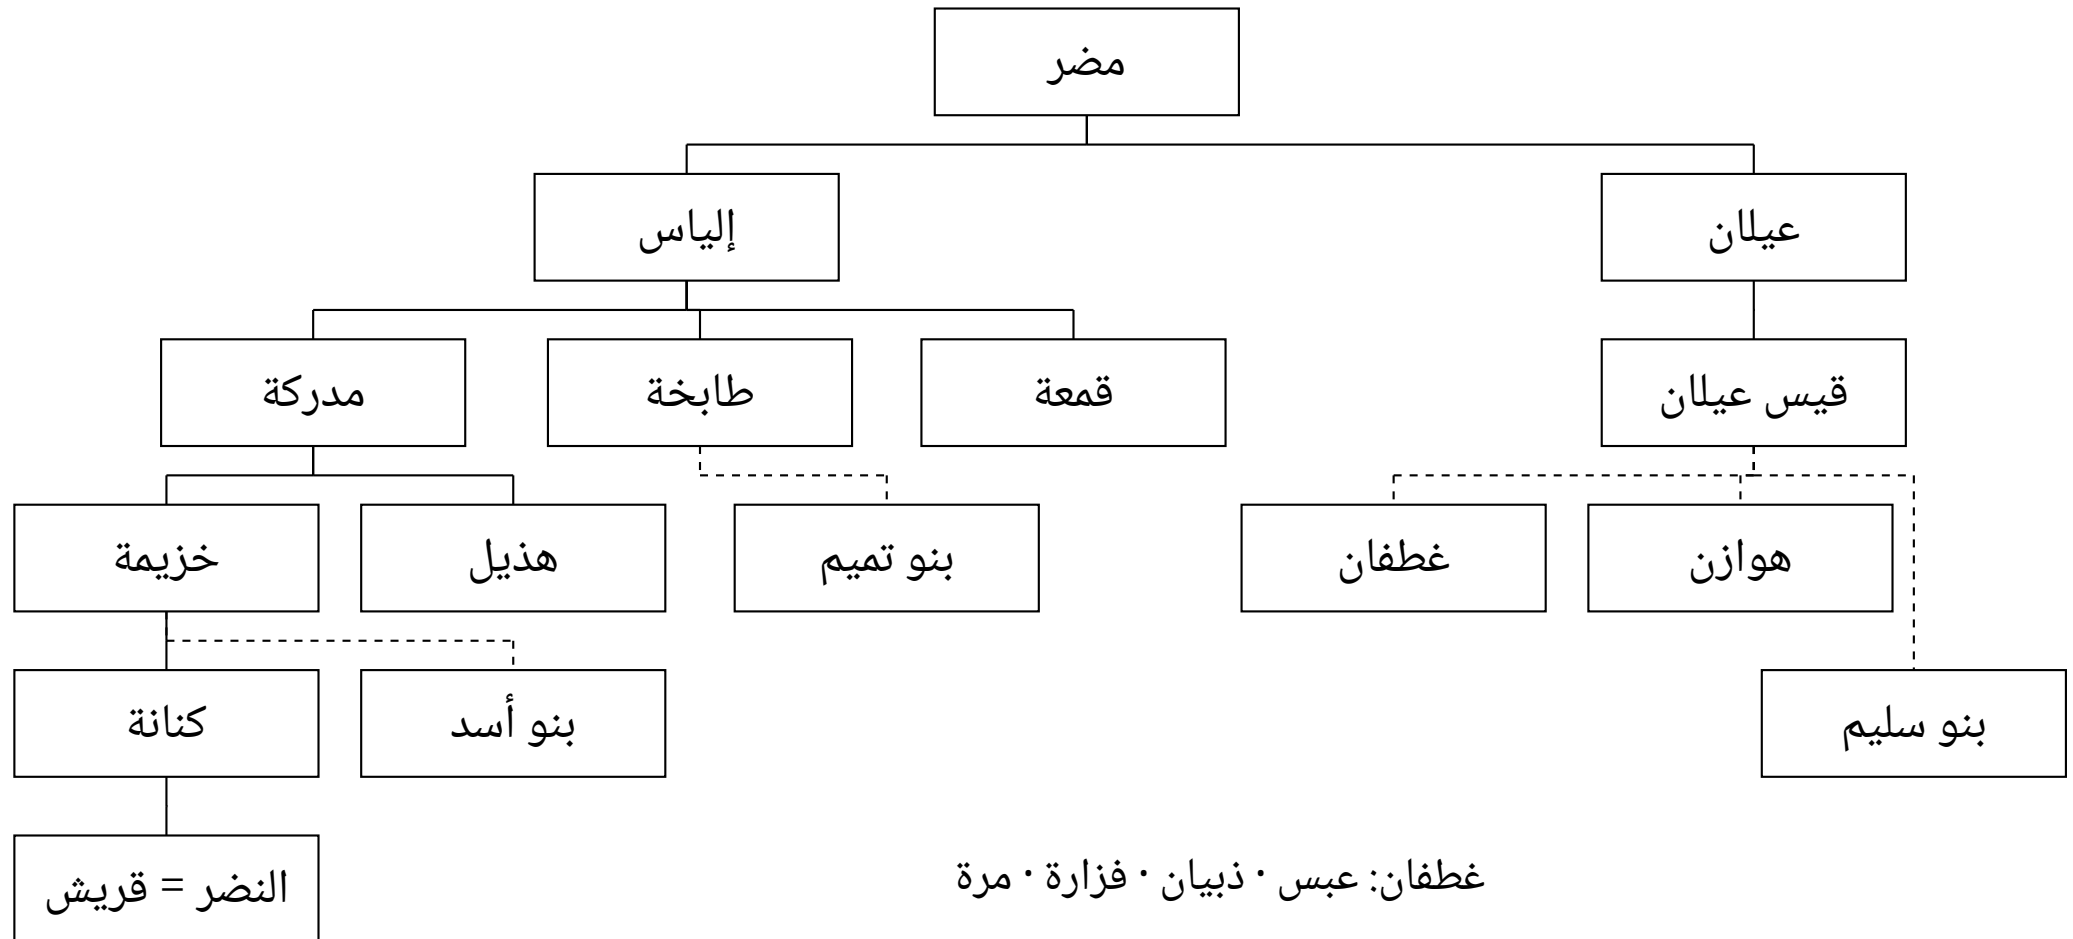

Solid = direct link. Dashed = broader descent with generations omitted, or disputed ancestry.

Notes / places / questions:

Reference tree: Mudar: Quraysh and related tribes

Trace shared trunks. Add locations beside the boxes and annotate the branches.

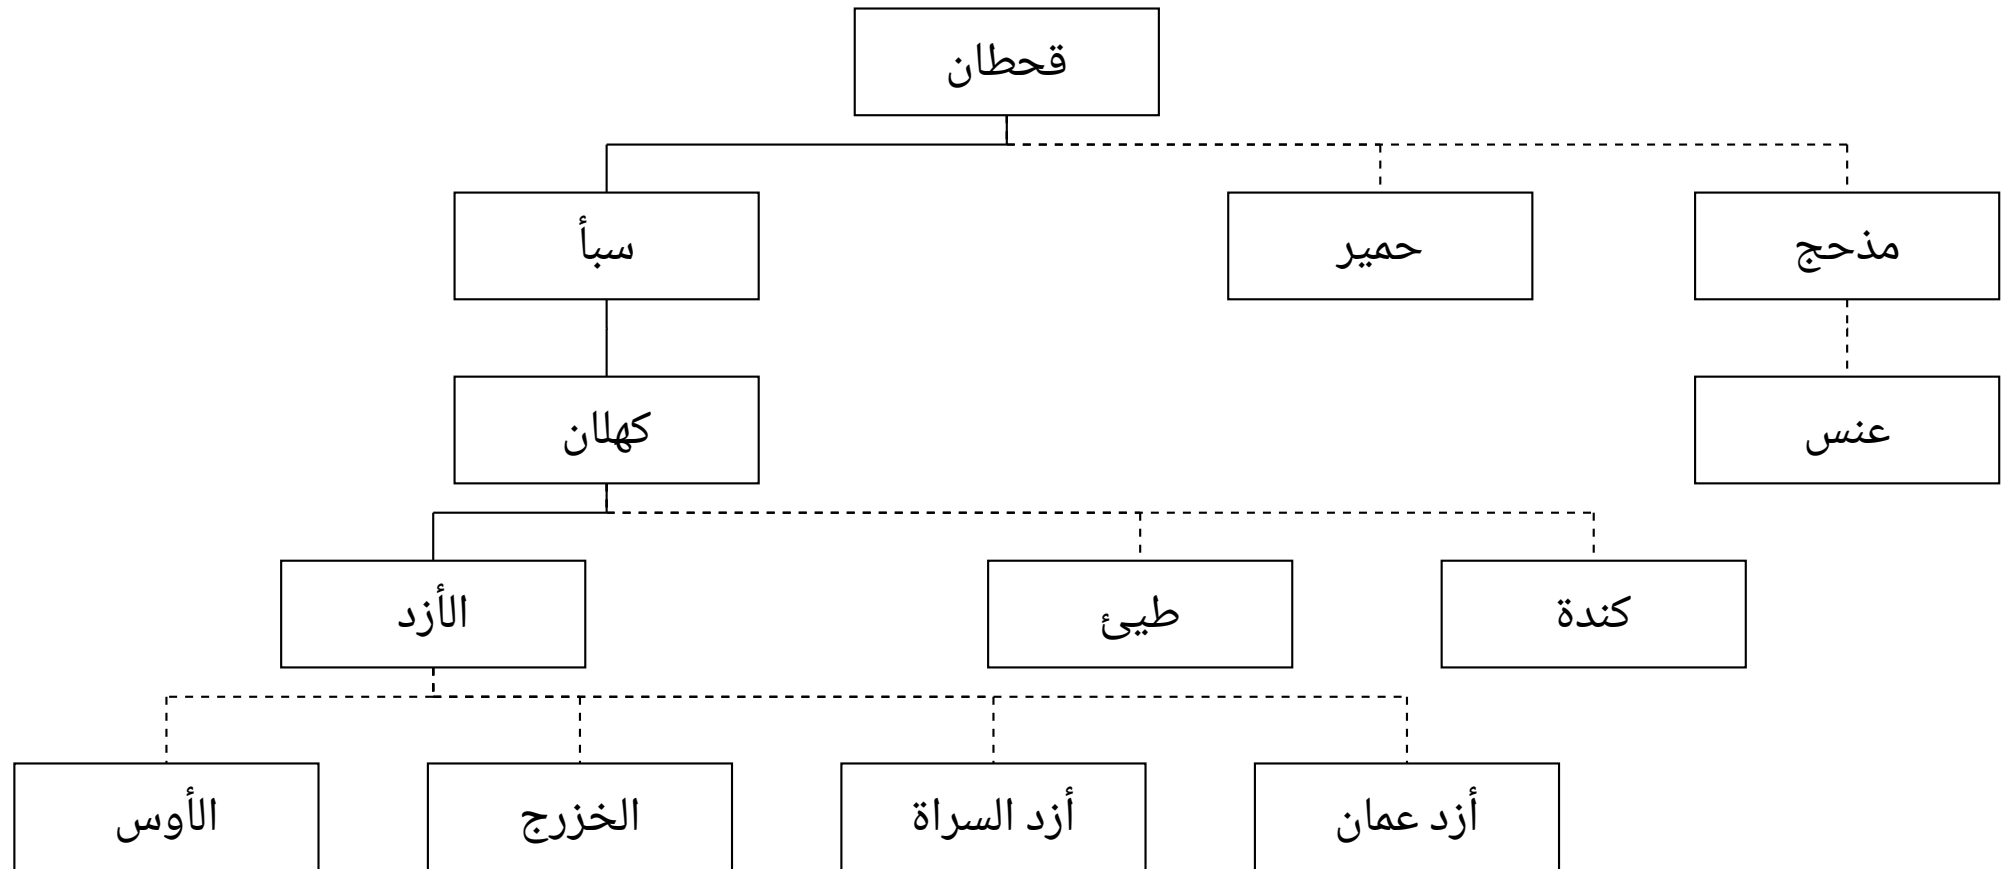

Solid = direct link. Dashed = broader descent with generations omitted, or disputed ancestry.

Notes / places / questions:

Reference tree: Qahtan: branches and dispersal

Trace shared trunks. Add locations beside the boxes and annotate the branches.

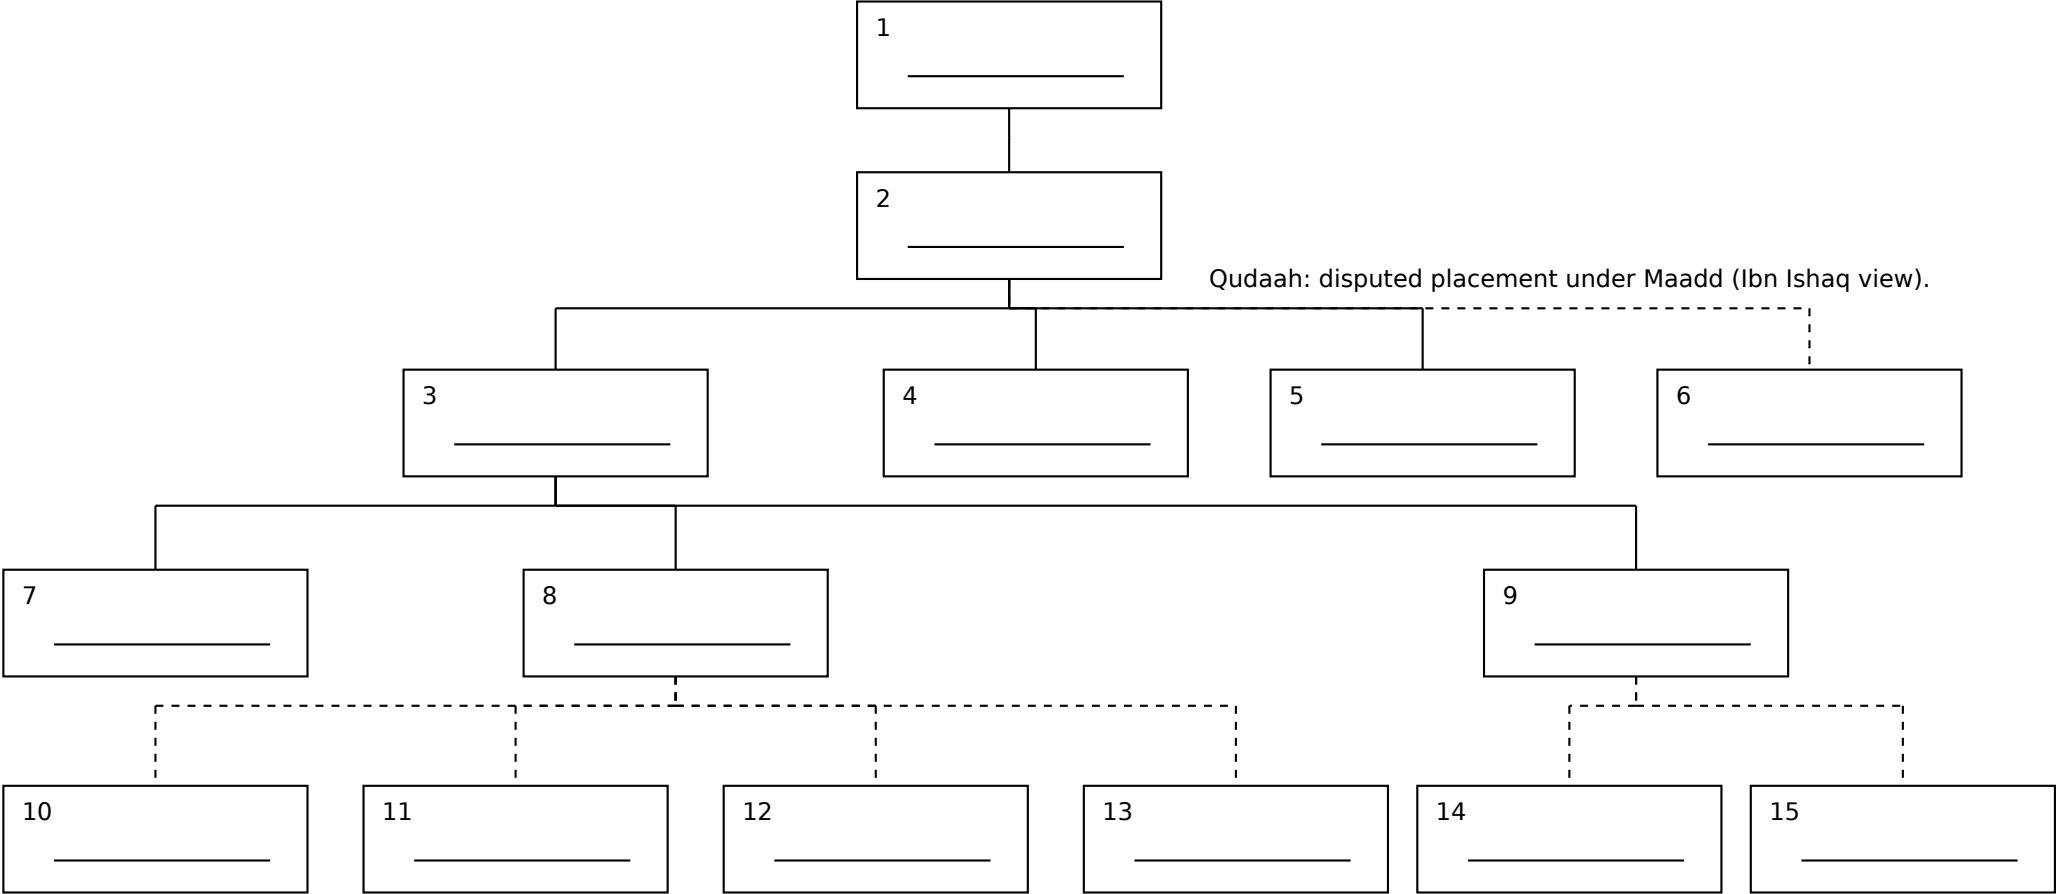

Aws + Khazraj = Ansar. Sarat / Oman labels also indicate geographic dispersal.

Solid = direct link. Dashed = broader descent with generations omitted, or disputed ancestry.

Notes / places / questions:

Complete the tree: Adnan: main branches

Write names in the numbered boxes; add places and notes.

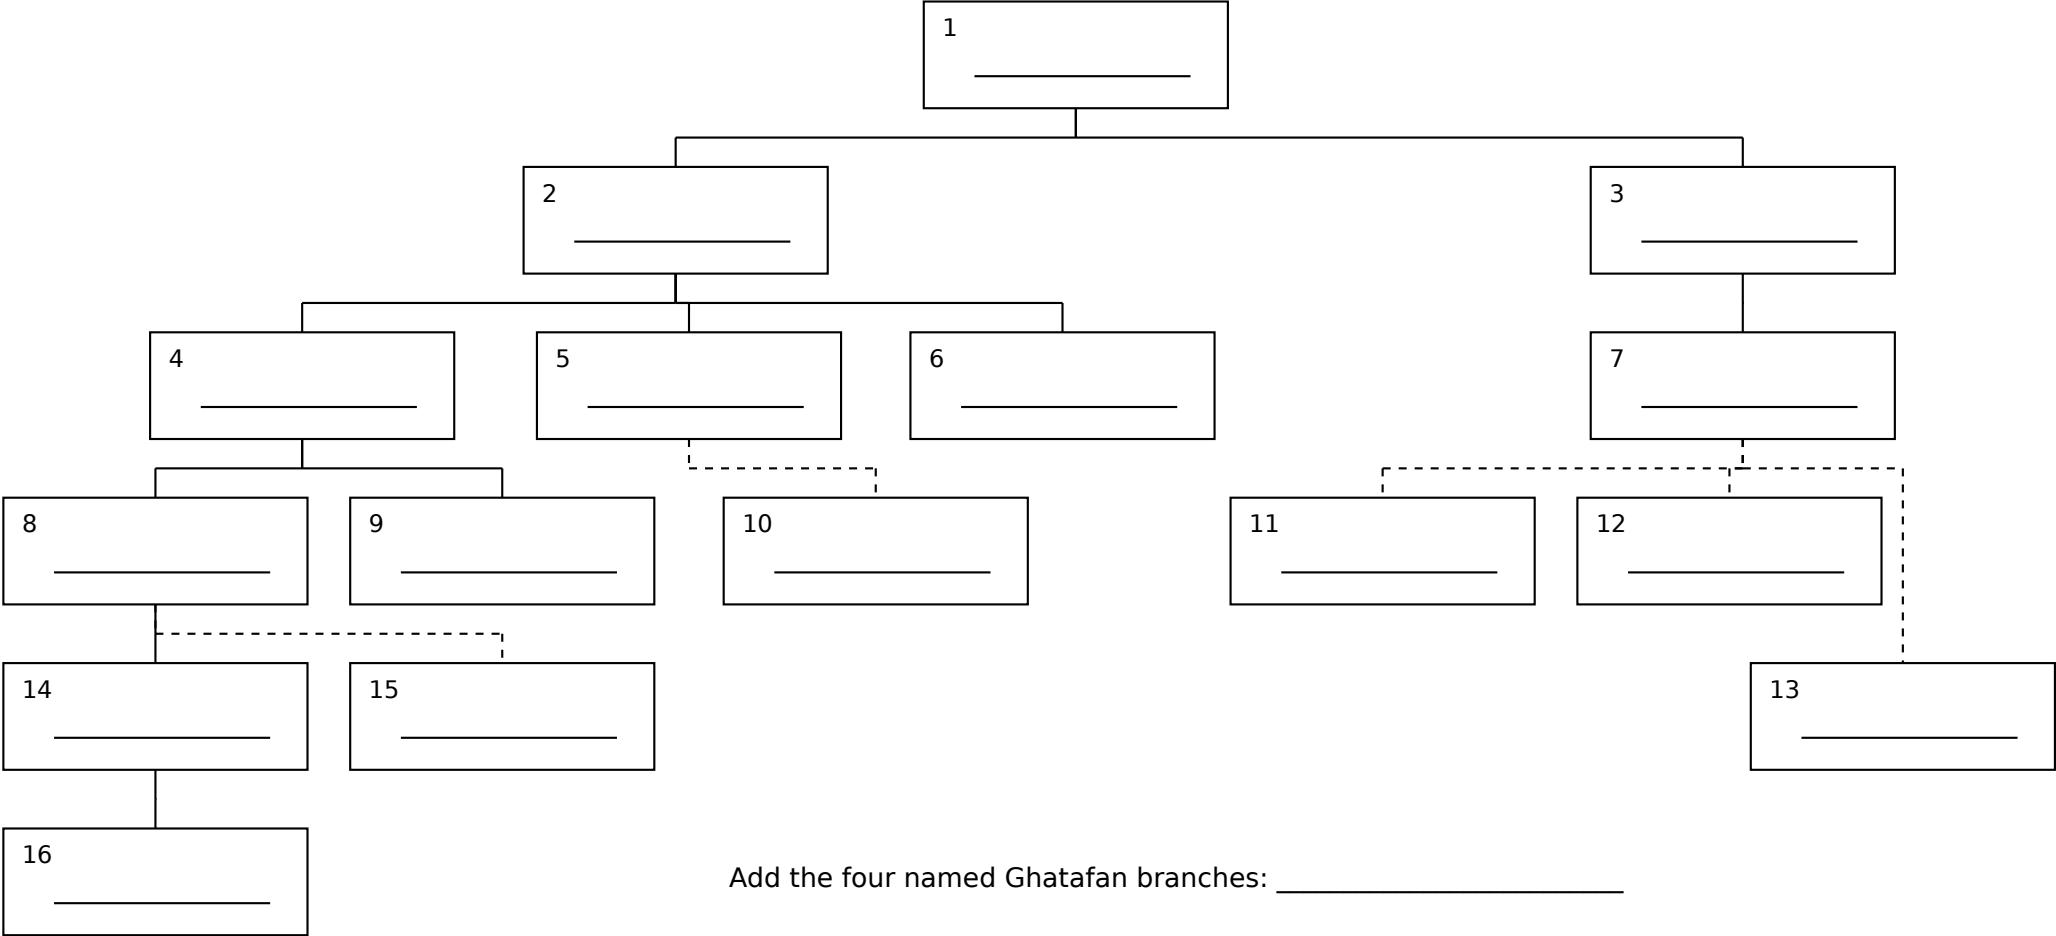

Solid = direct link. Dashed = broader descent with generations omitted, or disputed ancestry.

Notes / places / questions:

Complete the tree: Mudar: Quraysh and related tribes

Write names in the numbered boxes; add places and notes.

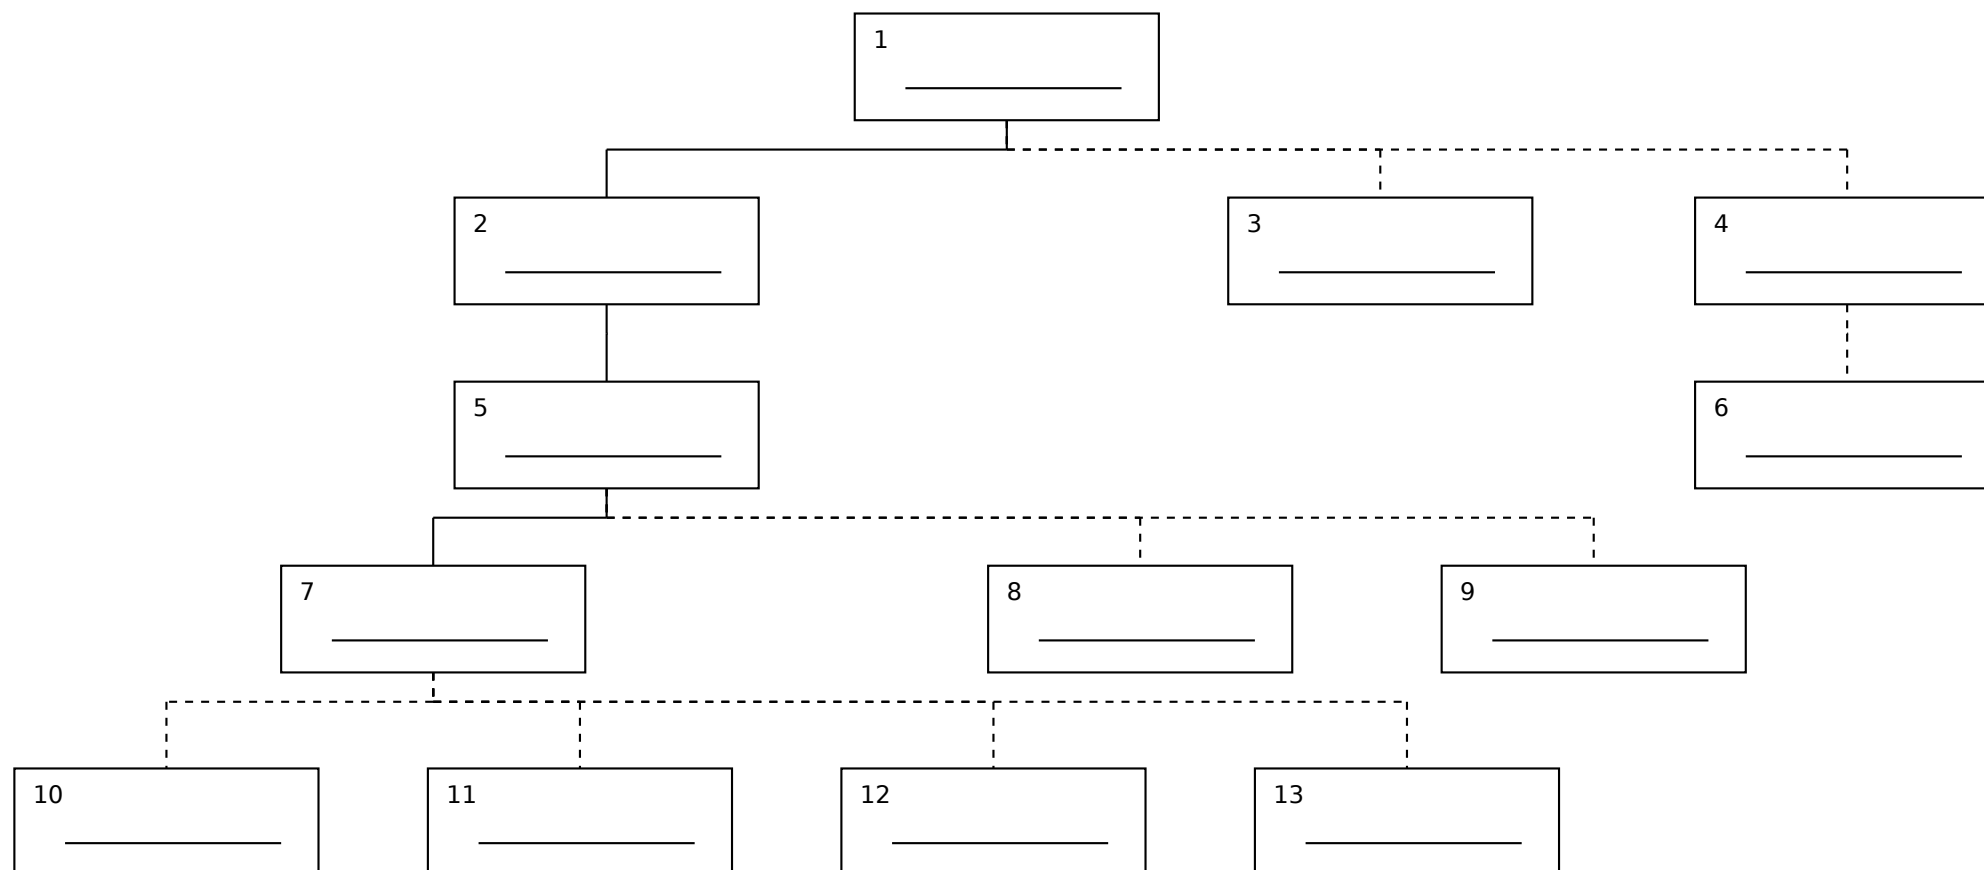

Solid = direct link. Dashed = broader descent with generations omitted, or disputed ancestry.

Complete the tree: Qahtan: branches and dispersal

Write names in the numbered boxes; add places and notes.

Aws + Khazraj = Ansar. Sarat / Oman labels also indicate geographic dispersal.

Solid = direct link. Dashed = broader descent with generations omitted, or disputed ancestry.

Notes / places / questions:

Practice: connect, trace and locate

Use the reference trees first. Then try again from memory.

1. Name the shared trunk shown for each pair.

بنو حنیفة / عبد القیس

قریش / بنو أسد

هوازن / بنو سلیم

الأوس / الخزرج

2. Trace the route from Adnan to Quraysh. Include every name shown.

3. Write the location associated with each tribe.

قریش

بنو حنیفة

طیئ

عبد القیس

4. Why is Qudaah dashed? Why are Aws and Khazraj called Ansar?

Answer key

Keep this page with the teacher, or use it for self-checking.

Blank trees (pages 4-6): use the matching reference trees (pages 1-3).

Practice 1 - shared trunks, in order:

ربيعة / خزيمة / قيس عيلان / الأزد

Practice 2 - read the Arabic sequence from right to left:

عدنان / معد / نزار / مضر / إلياس / مدركة / خزيمة / كنانة / النضر = قريش

Practice 3 - locations, in worksheet order:

مكة / اليمامة / أجأ وسلمى / البحرين

Practice 4: Qudaah under Maadd follows Ibn Ishaq; other genealogical views exist.

Ansar is the collective designation for Aws and Khazraj, not an additional ancestor.

Additional groups and their locations:

ثقيف	Taif.
همدان	Yemen.
مهرة	Between Oman and Hadramawt.
الأبناء	Sanaa; descendants of Persian settlers, not a tribe.
